New in Version 2.3

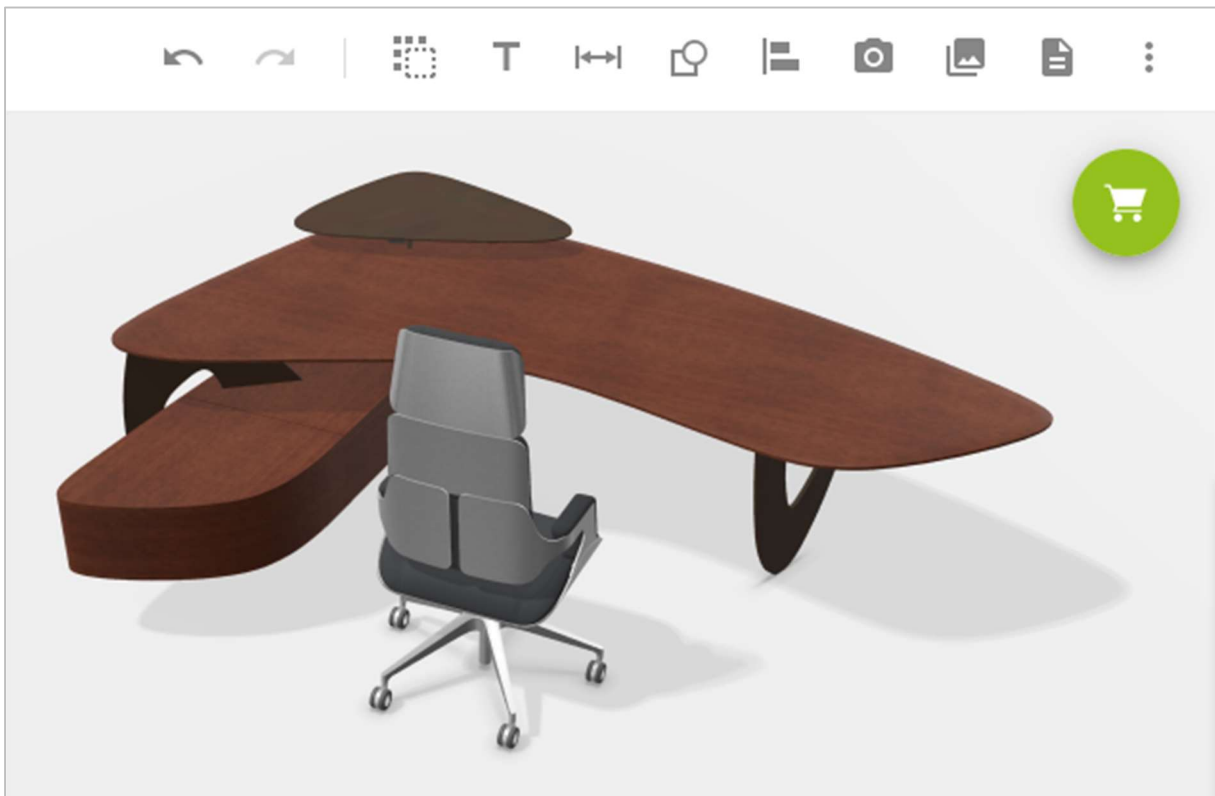

pCon.roomplanner

New in Version 2.3 (November 2022)

1 Transfer of Articles to pCon.basket PRO

A selection of articles or all articles can be transferred to pCon.basket PRO.

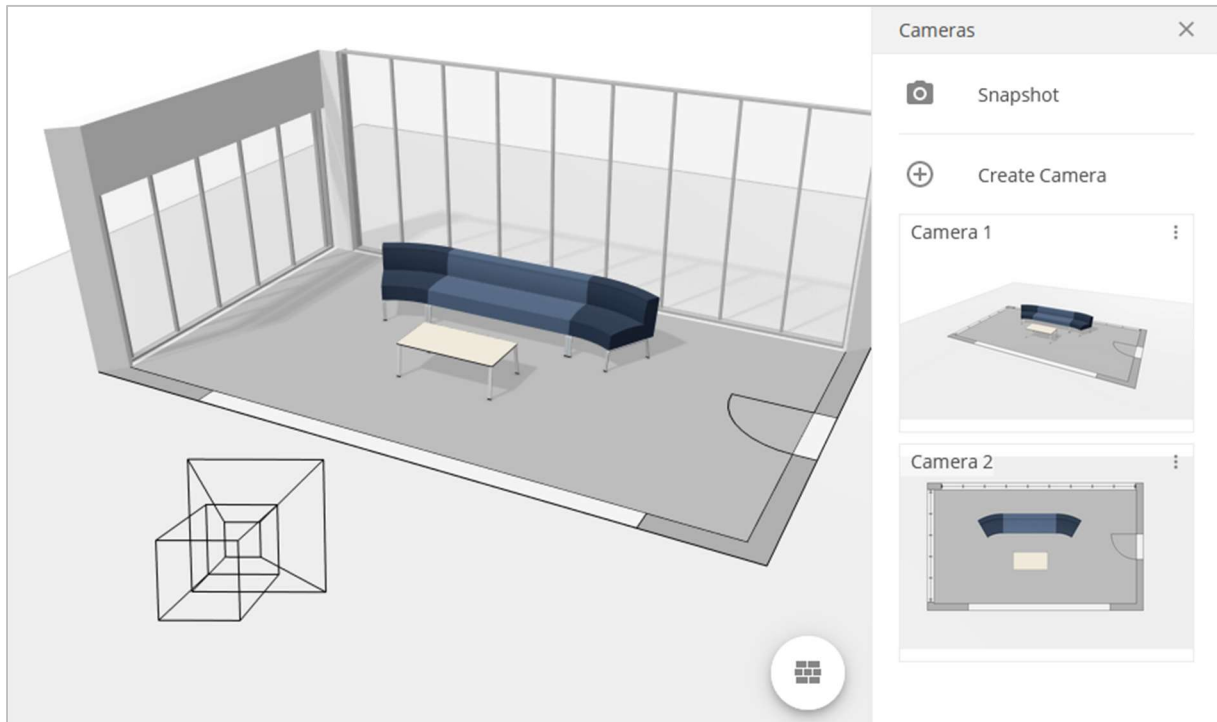

Afterwards, continue your work with pCon.basket PRO as usual.

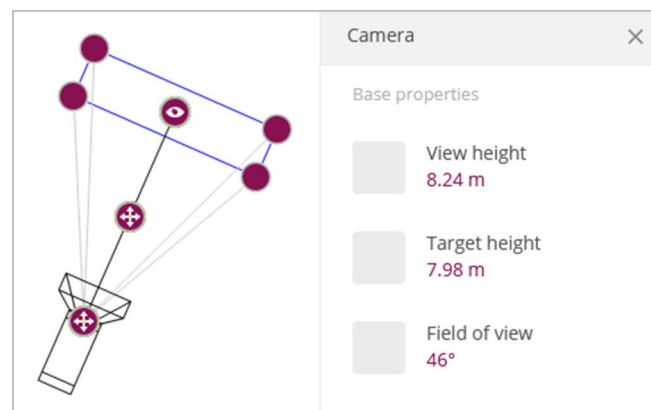

pCon.basket

2 Enhancement of Camera Control

Every camera you create is represented in your drawing by a symbol. This symbol allows you to select, move or delete the respective camera.

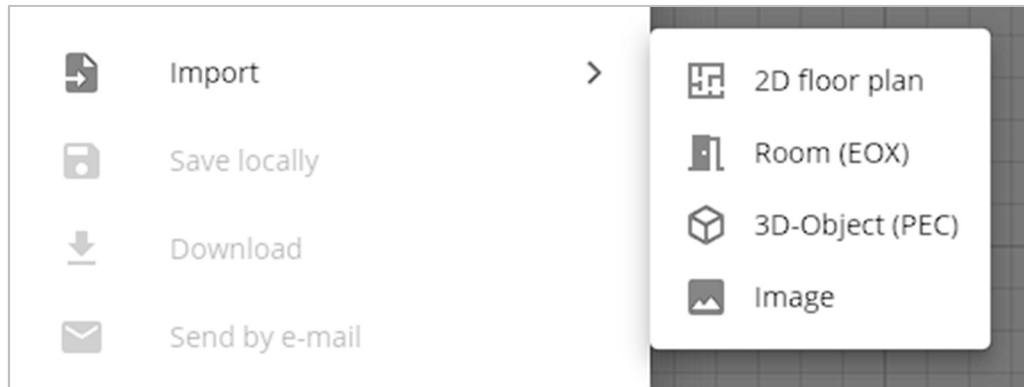

View height, target height as well as field of view are altered by entering new values or by moving the camera interactors.

3 EOX Import

The new app for three-dimensional room capture creates EOX files. These are imported via the hamburger menu. The scanned rooms, doors and windows provide the base for your further work in pCon.roomplanner.

Additional scanned objects, like tables or chairs, are represented by cuboids and receive an appropriate name. If required, these cuboids can be replaced by tables, chairs and further elements from the catalog.

4 Copy Snapshot to the Clipboard

When you open an image in the gallery, it can directly be copied to the clipboard and inserted in other applications.
