

Your internship with us looks like this:

During your internship, you will support our teams in a variety of exciting IT projects in the areas of conception, design and software development. According to your qualifications, you will already carry about independent work packages: Continued development of a USD Hydra render delegate with C++, integration of the Filament rendering engine, rendering of geometries and materials from the USD format, optimization of the rendering performance and documentation of the developed code.

Development of a Render Delegate for USD Hydra

Your skillset:

- Ongoing studies in computer science or comparable with good academic achievements
- Initial practical experience in software development, knowledge of C++, CMake and OpenGL / Vulkan will be an advantage
- Experience with GIT is a plus
- Fluent English knowledge

What we offer to you:

- An in-depth on-the-job training and a strong mentoring
- A warm and friendly working atmosphere supported by team and company events
- Active health promotion with modern workstations and gym membership if required
- Flexible working times and long-term career perspectives

For 25 years, we have been cooperating closely with well-known customers and partners across European borders through the success of our ‚pCon‘ brand. The focus here is on bundling our IT expertise in the areas of graphical product configuration and virtual room planning. Our 150 employees – heart of our company – appreciate especially the work-life balance, our active health promotion and the central location in Ilmenau.

**WE WELCOME
YOUR
APPLICATION!**
